

Geography

Introduction

Geography- the Science of Earth is a diverse term which deals with aerial differentiation of the surface of the earth. The individuals associated with geography are called Geographers. Geographers are scientists who study about the physical details of the environment, its effects on human and wildlife, weather and climate patterns, economics and culture.

Geography provides numerous options for those who have a keen interest in subjects like countries, people, economy, climate etc. Due of the latest technological developments like Remote Sensing and Geographical Information System (GIS), careers in geography are becoming more promising and challenging than ever before.
