## Job Prospects

- Urban Planner:** An urban planner may focus on a specific area of practice and have a title such as city planner, town planner, regional planner, long-range planner, transportation planner, infrastructure planner, environmental planner, parks planner, physical planner, health planner, planning analyst, urban designer, community development director, economic development specialist or other similar combinations.
- Regional Planner:** Regional planners do the same over a larger area consisting of several cities and towns. Simply put, Urban and Regional Planner make a decision as to where should parks, plazas, markets, schools, colleges, residential buildings, commercial buildings, bus stations, etc.
- Project Planner:** As a project planner, you will be primarily responsible for managing our construction projects from start to completion. You should be able to meet and discuss with clients their project requirements. Besides, you should ensure that the projects are completed on time and as per the assigned budget.

- **Interior Designer:** The Interior Designer will create functional, safe, and aesthetically pleasing spaces by assessing space requirements, determining optimal furniture placement, and selecting decorative items, all while adhering to relevant blueprint, building code, and inspection requirements.
- **Design Architect:** A design architect, or Architectural Designer, is responsible for designing buildings to create unique and well-organized structures. Their duties include meeting with clients to discuss their vision, drawing up building plans and modifying their designs throughout the building process to maximize structural integrity.
